

	4. What does MSE stand for?	1/1 point
	Mean Second error	
	Mean Squared error	
	Mean Slight error	
	Mean Series error	
	✓ Correct	
	5. What does MAE stand for?	1/1 point
	Mean Average Error	
	Mean Advanced Error	
	Mean Absolute Error	
	Mean Active Error	
	✓ Correct	
	6. If time values are in time[], series values are in series[] and we want to split the series into training and validation at time 1000, what is the correct code?	1/1 point
	time_train = time[:split_time]	
	x_train = series[:split_time]  time_valid = time[split_time]	
	x_valid = series[split_time]	
	time_train = time[split_time]	
	x_train = series[split_time]  time_valid = time[split_time]	
	x_valid = series[split_time]	
	time_train = time[split_time]	
	x_train = series[split_time]  time_valid = time[split_time:]	
	x_valid = series[split_time:]	

7	<ul> <li>time_train = time[:split_time]</li> <li>x_train = series[:split_time]</li> <li>time_valid = time[split_time:]</li> <li>x_valid = series[split_time:]</li> <li>\(\subseteq \text{Correct}\)</li> <li>If you want to inspect the learned parameters in a layer after training, what's a good technique to use?</li> <li>\(\text{Run the model with unit data and inspect the output for that layer}\)</li> <li>\(\text{Assign a variable to the layer and add it to the model using that variable. Inspect its properties after training}\)</li> </ul>	1/1 point
8	<ul> <li>○ Iterate through the layers dataset of the model to find the layer you want</li> <li>○ Decompile the model and inspect the parameter set for that layer</li> <li>✓ Correct</li> <li>How do you set the learning rate of the SGD optimizer?</li> </ul>	1/1 point
	<ul> <li>You can't set it</li> <li>Use the Rate property</li> <li>Use the RateOfLearning property</li> <li>Use the Ir property</li> </ul>	
9	<ul> <li>✓ Correct</li> <li>If you want to amend the learning rate of the optimizer on the fly, after each epoch, what do you do?</li> <li>○ Use a LearningRateScheduler and pass it as a parameter to a callback</li> <li>○ Callback to a custom function and change the SGD property</li> <li>● Use a LearningRateScheduler object in the callbacks namespace and assign that to the callback</li> <li>○ You can't set it</li> </ul>	1/1 point
	✓ Correct
